***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a measurement tool, classified in class 606, subclass 1.
  - II. Claims 8-19 and 26, drawn to tool, classified in class 606, subclass 1.
  - III. Claims 20-21, drawn to a cystodiagnosis brush, classified in class 600, subclass 569.
  - IV. Claims 22-25, drawn to forceps, classified in class 606, subclass 205.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, III and IV are related to Invention II as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II and IV has separate utility such as with rigid shafts or flexible shafts with pivoting joints. See MPEP § 806.05(d).
3. Inventions I, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions operate differently according to the structure claimed (invention I functions as a measurement tool, invention III functions as a brush and invention IV functions as a forceps).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III or IV, the search required for Group III is not required for Group IV or I and the search required for Group IV is not required for Group I or III, restriction for examination purposes as indicated is proper. To evidence the requirement of

“serious burden”, it is noted that the application of such requirement affects both search and examination of the claimed patentably distinct inventions. Therefore, as much as the search for the distinct inventions might overlap to a certain extent, there still exists the burden of separate analysis of the prior art references for each distinct invention, as well as a separate written analysis in the Office Action.

5. Upon election of Group II above, Applicant must select claims directed to the following patentably distinct species of the claimed invention:

Species I: pair of grooves with wire running through grooves

Species II: pair of holes with wire running through holes

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 8-10 and 16-18 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

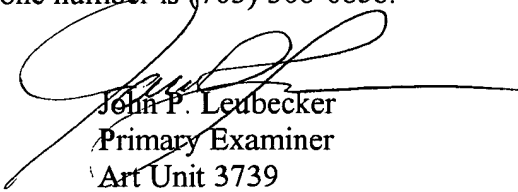

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Leubecker whose telephone number is (703) 308-0951. The examiner can normally be reached on Monday through Friday, 6:00 AM to 2:30 PM.
